PROFESSIONAL SUMMARY

An enthusiastic and motivated Information Technology undergraduate currently pursuing the Higher National Diploma in Information Technology (HNDIT) at the Sri Lanka Institute of Advanced Technological Education (SLIATE), Advanced Technological Institute, Dehiwala. Possesses academic project experience in web development, desktop application development, mobile application development, and database management, with knowledge of HTML, CSS, JavaScript, PHP, Dart, Flutter, Java, C#, MySQL, and Firebase. Demonstrates strong analytical thinking, problem-solving abilities, and a keen interest in software development and emerging technologies. Capable of applying theoretical knowledge to practical development tasks, adapting to new technologies, and working effectively in collaborative environments. Eager to gain industry experience, enhance technical expertise, and contribute positively to organizational goals through continuous learning and professional development.

TECHNICAL SKILLS

- Frontend and Mobile Development: HTML, CSS, JavaScript, PHP, Dart, Flutter
- Backend and Desktop Development: Java (Swing), C# (Windows Forms)
- Databases and Cloud: SQL, MySQL, Firebase Authentication, Cloud Fire store
- Tools and IDEs: Visual Studio, Visual Studio Code, NetBeans, GitHub, Android Studio

ACADEMIC PROJECTS

Enterprise Meal Management System (EMMS) | Academic Project | Flutter and Firebase

A proposed meal management application designed to streamline an organization's meal planning process. The system is intended to help employees select meals in advance and support kitchen staff in preparing appropriate quantities.

- Planned role-based functionality for employees, kitchen staff and administrators.
- Employee meal selection for breakfast, lunch and overtime dinner.

- Kitchen view for meal counts and preparation status, with administrator functions for employee management and reporting.
- Includes planned deadline-based meal selection rules.
- Technologies: Flutter, Dart, Firebase Authentication, Cloud Firestore

ABC Shopping Store | Web Development Project | HTML and CSS

A website concept for cosmetics, skincare and wellness products, designed to provide a clear and user-friendly online shopping experience.

- Structured navigation for Home, About, Arrivals and Contact pages.
- Product catalogue concept covering makeup, skincare and wellness products.
- Planned shopping cart, search, Wishlist and promotional sections. • Technologies: HTML, CSS

Inventory System | Desktop Application Project | Java and MySQL

A desktop application designed to help a small business manage products, stock, customers, orders and billing records.

- Login and dashboard, with user management and product/category management.
- Customer records and order creation, including bill generation and PDF bills.
- Order history view and MySQL database for users, products, customers and orders.
- Technologies: Java (Swing GUI), MySQL, JDBC, iText, NetBeans IDE

Oceana Shop | Desktop Application Project | C# and Windows Forms

A Windows desktop application concept for a cosmetics and accessories shop, supporting staff login, product browsing and customer billing.

- Welcome, login and loading screens leading to a main menu.
- Product catalogue screens with images for jewelry, hair accessories and other items.
- Billing screen to calculate item prices based on selection and quantity.
- Loyalty member option offering a small checkout reward.
- Technologies: C# (Windows Forms), .NET Framework 4.5.2, Visual Studio

EDUCATION

- Higher National Diploma in Information Technology (HNDIT) | 2024 – Present SLIATE (ATI Dehiwala), Dehiwala
- Diploma in Information and Communication Technology (DIT) | 2024 Aquinas College of Higher Studies, Borella
- GCE Advanced Level – Commerce Stream | 2022
  Sandalanka National College | ICT – B, Accounting – C, Economics – C
- GCE Ordinary Level | 2019
  St. Pope Paul IV National School | B pass for ICT including all subjects

CERTIFICATIONS AND COURSES

- Web Design for Beginners – University of Moratuwa (CODL)
- Python for Beginners – University of Moratuwa (CODL)
- User Interface Design with Figma – Alison
- Handling, Storing and Managing Data for Information Management – Global Nutrition Cluster and UNICEF
- Software Testing and Documentation AI – Simplilearn
- Business Analytics with Excel – Simplilearn
